Rod:

Great minds....

I agree and am going to take you up on your offer. I think the Basin Commission would be a quick 15 min overview of what folks are about to see in 3D. Let's plan on just doing that coupled with strategic stops. One thought, it would be cool for folks to see the slurry wall activities up close. Things should be running like a well-oiled machine at that point and there might be ample room for folks to get off of the busses and see the wall activities first-hand depending upon where the activities are. Again would not need to rely on Wood for providing anything and we could provide a safety do/don't at the meeting.

Ed, I concur with what Eric wrote and was wondering if there is actually any value added for the tour group to actually squeeze in in two separate groups for a project overview at the job trailer given that they really wouldn't be able to see any of the actual project from that location. One suggestion I'd have instead of trying to squeeze groups into the job trailer would be to maybe have Eric or one of his team provide that kind of overview at the Basin Commission meeting itself. Eric, I'm not volunteering you or your team for anything here by just wanted to suggest it as a potential alternative given that there may be limited value added for the group to squeeze in at the project trailer. Ed, alternatively I could provide the project status/overview at the Basin Commission meeting and/or during the overview stop points like I did last summer. Just a thought.

Thanks,

Rod Zion

Ed – Charles Hand will be available to provide a tour to the investor during the week of 8/6. Regarding the large tour on 8/15, as I noted on the call on Monday, we would like to support that, but don't think that a tour through the site for that many people will work. If we could do an overview of the project in the trailer in two groups (25-35 each), I think that we could accommodate that. How long would the stop at the CTP be?

Subject: Bunker Hill Mine tour

Eric:

The operator of the Bunker Hill Mine has informed me that he will have an investor in town the week of August 6 and would like to schedule a tour of the CTP. I will accompany them but I would like to request your assistance for providing the tour. I don't know much about them but would like to accommodate the request as they enter their capital raising phase.

Please let me know if there any issues with doing so via email. I don't plan to bring this up on the call in the interest of respecting their privacy.

On another note the Basin Commission will be conducting its annual tour of the active projects in the CDA Basin on August 15. We planned on doing the GCS/CTGP site overviews from the perches on McKinley Ave and Galena Ridge development. As an aside, Tom Bourque has reached out to me and is suggesting we get a little more close up and personal with the construction. While that may be very eye opening this will be a rather large group of 2 busloads plus a few cars (50 – 70 people) so is a challenge to manage. Don't feel compelled to allow this unless you feel like it's a good opportunity to show your stuff. We can discuss this more on the call today.
